Research in Psychotherapy

E. J. Rubinstein and B. M. Parloff, Editors

Proceedings of the First Conference on Research in Psychotherapy held in 1958.

and

Research in Psychotherapy Vol. II

H. H. Strupp and L. Luborsky, Editors

Proceedings of the Second Conference on Research in Psychotherapy held in 1961.

These two books result from the efforts of leading research workers in psychology and psychiatry and deal with selected research issues and assess new research developments. The efforts of the conference attendees place research in psychotherapy more squarely within psychological research concerned with understanding interpersonal processes.

The passive irritates the reader who wants clear direct diction. So also does the too frequent use of I. *It is entirely a problem as to when* I *is egoistic! It is plain that the reader expects more deference and fewer* I's *from the young author than from an older, well-known writer, but my own judgment is that even the young writer may safely use* I *if he really feels a deference for his reader. And why should he not, since the existence of his public is a necessary reason for his research? The altruistic principle, here reduces to a matter of good manners. The first person singular will not offend if it is used modestly.*

—EDWIN G. BORING
